

ANNLYN MOTORS MONTHLY SPECIAL

PORTABLE NAVIGATION SYSTEM, 3790

FACTS AND ADVANTAGES

- Simple to use slim line design .
- Anti-theft protection Garmin Lock with PIN code protection
- Integrated GPS positioning sensor and separate GPS antenna for ensured satellite reception.
- Integrated FM transmitter¹
- Possibility of speed camera notification²
- Fully integrated TMC, no visible cables or antennas
- High reception performance ensures that traffic information is not missed (TMC)
- Super-sharp color screen in widescreen format
- Mounted on a pillar of car no obstruction of view.
- Automatic changeover between day and night illumination, including color switching
- Traffic information via TMC

The navigation device is equipped with automatic route calculation, 2D or 3D map views, an easy to use touch screen and voice guidance, which also pronounces street names.

You can also load your own personal Points of Interest (POI). These can include anything from speed cameras to camping sites, etc. This type of information is easily transferred to the device via the software POI Loader.

The navigator also has the Where am I function. A simple press on the screen gives the driver a precise current position in latitude and longitude. At the same time as showing nearby addresses and junctions, nearest hospitals, police stations and petrol stations.

The Navigator can also be supplemented with TMC (Traffic Message Channel). This gives you the option of receiving traffic information and alternative route suggestions to avoid roadworks, accidents or other traffic related incidents.

The navigator can be removed so you can take it with you for updating map data and system software.
